

BOB CREASEY – CONSULTANT (FOOD & DRINK)

I am currently working as a Consultant with Level 2 & 3 Modern Apprentices in Food Manufacture. I also do Train the Trainer and Development units. I am delivering qualifications in a variety of areas i.e. cattle droving, seafood processing and poultry processing.

I have 11 years experience in the food industry from working in despatch to being a Training and Health & Safety Manager for a Scottish Food Group.

Starting as an Operative in despatch led to being an Assessor which then grew into a larger role that covers all areas of the company and group, as Training and Health & Safety Manager.

This role increased my knowledge and understanding of production processes, systems, equipment etc. I worked closely with Department Managers, Technical Managers, Factory and Production Managers in areas such as Training, Risk Assessment, Food Safety and Fire Risk Management.

My interests outside of work are doing D.I.Y home improvement and gardening (hard landscaping) and socialising with friends.
